

FEATURES

Description

1. Advanced Property Search

- **Filters:** Users can search properties based on location, rent price, property type (Apartment, Villa, PG, Independent House), number of bedrooms, furnishing status, and amenities such as parking, Wi-Fi, pet-friendly, gym, and security.
- **Saved Searches:** Users can save their search preferences and receive recommendations when new matching
- properties are listed.

2. Property Listings & Management

- **Property Upload:** Landlords can add new properties with title, description, rent amount, location, amenities, images, and availability status.
- **Property Management:** Owners can edit, update, or remove property listings and manage property availability in real time.

3. Smart Booking System

- **Online Booking:** Tenants can request bookings for available properties by selecting preferred move-in dates.

- **Booking Status Tracking:** Users can monitor booking status (Pending, Approved, Rejected, or Cancelled) through their dashboard.

4. Market Insights & Trends

- **Rent Price Trends:** Displays average rental prices across different locations to help tenants and landlords make informed decisions.
- **Local Area Insights:** Provides nearby facilities such as schools, hospitals, supermarkets, public transport, and safety information.

5. User Communication

- **Real-Time Chat:** Secure messaging between tenants and landlords for property-related discussions.
- **Notifications:** Instant alerts for booking requests, approvals, cancellations, and property updates.

6. User Profiles

- **Tenant Profile:** Manage personal details, booking history, saved properties, and favourite listings.
- **Landlord Profile:** Manage property listings, booking requests, tenant information, and rental history.

7. Admin Management

- **Property Verification:** Admin verifies property listings before publishing them.

- **User Management:** Manage tenant and landlord accounts, remove fraudulent listings, and monitor platform activity.
- **Analytics Dashboard:** View statistics on registered users, active properties, completed bookings, and platform usage.

8. Security & Authentication

- Secure login and registration using encrypted passwords.
- Role-based access control for Admin, Landlord, and Tenant.
- Protected REST APIs with authentication and authorization.
